## My24HourIncome Withdrawal – How?

This will be updated soon, but for the moment you should care following.

Your account must be verified with payment processors i.e. Payza before you can make a withdrawal. If you have deposited money using Payza to My24HourIncome, you can withdraw money ONLY by Payza. Similarly, if you have deposited money using another payment processor such as Payeer to My24HourIncome, you can withdraw money ONLY by Payeer. The same process will happen for Perfect Money and Coin Payments.

I do suggest that you make deposits using at least two methods so that there will always be an alternative.

Please note that you cannot withdraw money if payment processor account is not verified. There is no problem to deposit money. To verify account you must provide:

- ID card front and back
- Credit card/ bank statement

**Important:** Name and address MUST be same with payment processor account, My24HourIncome account, ID card and credit card statements. Any differences will cause unnecessary problems. I highly recommend that you keep your credit card or bank statement when you make any money transfer from your credit card or bank to payment processor's account. They may ask for it in near future. For example: If you want to order Trust card or debit card from Solid Trust Pay.

There are no charges to transfer money from My24HourIncome to Payza or other payment processors. However, withdraw from payment processors account to your bank account, there are different charges based on payment processors. Please check to your payment processor for withdrawal charges.
